

Course Planning Template

1	_____	4	_____
2	_____	5	_____
3	_____	6	_____

Use the spaces below to outline the topics for your course. You might write or draw in the spaces, or attach sticky notes that you can move around. Think about what you would want the learner to know if they only took away 3-4 key points from the learning material, and add those items first. Also consider the order that concepts should appear in your course and which concepts work well in a group.
